

The most awarded can opener on the market!

CanPRO leaves the circumference and lip of the lid intact, so the lid doesn't fall into the can.

SAFE!

Cutter design alleviates metal slivers.

SIMPLE!

Cutter module makes a quick change in a busy kitchen.

STRONG!

Gearless drive means no gear breakdown.

Turns the old chore of opening cans completely around!

**COMPACT model
2008RH-B**

Smooth Operator

Say goodbye for good to the “lift, slam, puncture and rip” can-opening techniques that have been overstressing elbows for 100 years. The NEW redesigned CanPRO Compact runs smarter and easier and longer than ever.

Think Outside the Can

Unlike conventional can openers that puncture and cut down into the lid from the top, CROWNWARE’s CanPRO cuts from the side, along the lid’s outer seam.

- The cutter never makes contact with the inside of the can.
- No metal shavings fall into the food.
- The lid comes off clean with no jagged edges.

Seams So Smooth

As a result of NEW engineering, the compression of the CanPRO’s cutter has been carefully fine-tuned to improve performance.

- The cutter’s new design won’t penetrate past the first layer of metal on the lid’s seam, alleviating the potential for producing metal slivers if the user overrotates the can.
- When the cutter runs its life cycle, it won’t cut at all, clearly indicating it should be replaced.

Cut and Run...and Keep Running

The NEW CanPRO is specially designed to minimize downtime and costly repairs. Plus, the entire unit is dishwasher-safe.

- No more gear breakage or wear, thanks to a completely gearless handle.
- The cutter housing is a quick-clean or quick-change module-switch out a used for a new with just a pull of a pin. Keep an extra new modular cutter on hand, and you’re never down.
- Stainless steel and aluminum nickel-plated components translate into a long, virtually maintenance-free life.

Can-locking feature - (holds up to #10 cans) - easily orients and holds the cutter to the lid.

Stainless steel permanent mount model - screws into the countertop. The security model option (shown) includes a locking capability. (Lock not included.)

Stainless steel under clamp model - easily and securely affixes to any counter up to 2 3/4” thick. (Bolts not included.)

Tough, lasting, precision-ground stainless steel cutter - cuts up to 5,000 lids, and is easy to replace.

Separate cutter housing assembly - When you purchase your CanPRO, be sure to order an extra, easy-to-replace cutter housing assembly to minimize downtime.

Model	Description
2008RH-B	CanPRO Compact, Basic
2008RH-U	CanPRO Compact, Under Clamp
2008RH-S	CanPRO Compact, Security Model
CC307	Cutter Housing Assembly
CC026	Cutter

Dimensions	
Max. height	9 1/2” (holds up to #10 can)
Handle radius	6”

Recommended handle turns per can size:

Can size	Diameter	Handle turns
#2	3”	3 revolutions
#5	5”	5 revolutions
#10	6”	6 revolutions

Note: Too many rotations - going beyond the point of initial cut - may produce metal slivers.
